INDEX TO VOLUME XVIII.

A.

Academy Nat. Sci., Philad., Proceedings of, 160. 304, 451.
of Sciences. Paris, elections to, 381.
Air-engine, see *Ericsson*.
Allen on Victoria regia, noticed, 428.
Alter, D., on certain properties of light, 55.
Aluminium, *Deville* on, 119.
Amber, on fossil plants in, 287.
American Acad. of Arts and Sciences, Proceedings of 160.
Association, list of papers read at Washington meeting, 143.
Amphitrite, a new planet, 137, 290.
Analysis, use of hydrogen and carbonic acid in, *Rogers*, 213.
test for zirconia in, 415.
on *Fuchs's* method for iron, 227.
Anesthesia, local, 122.
Ansted's Scenery, Science, and Art, noticed, 448.
Aquarium, manufactured seawater for, 293.
Arago, works of, announced, 120.
Ararat, height of Mt., 440.
Arseniuretted and antimoniuretted hydrogen, in relation to toxicology. *Napoli*, 190.
Asphyxia, use of oxygen in, 122.
Archives de Physiologie, etc., of Bouchardat, noticed, 157.
Artesian well in Italy, temperature of, 424.
Artificial products of furnaces, *Hausmann*, 421.
Atlas of North America, Lange's, noticed, 449.
Atmosphere, electricity of, *L. Palmieri*, 415
Aurora Borealis, *De la Rive*, 353.

B.

Bache, A. D., Tides of Key West, 305.
Bailey, J. W., on a mode of giving permanent flexibility to specimens, 100.
Baird, S. F., on Serpents of New York, 448.
Barnard, F. A. P., on the comparative expenditure of heat in different forms of Air engine, 161.
Beale, T., on the microscope, noticed, 302.
Becquerel, on electro-chemical action, 382.
Bellona, a new planet, 137, 290.
Benzine, for Greek fire, 388.
Benzoëoxyd and allied compounds, 412.
Bibliographical notices, by *J. Nicklès*, 302.
Birds, work on, by *J. Cassin*, noticed, 157.
Bischof's Lehrbuch, noticed, 426.
Blake, W. P., on gold and platinum of C. Blanco, 156.
on earthquakes in California, 151.
notes on California, 441.
Blood, fountain of, in Honduras, 439.
Blowpipe with india rubber barrel, 121.
Boscovich's theory, *E. B. Hunt* on, 243.
Boston Soc. Nat. Hist., Proceedings of, 159.
Botanical Bibliography, 131, 284, 428.
Botanical specimens, mode of giving flexibility to, *Bailey*, 100.
Brazil, map of, by *Martius*, 156.
Brant, J. R., on Fuchs's method for the determination of Iron, 227.
Brucine, decomposed by nitric acid, 413.
Brush, G. J., chemical composition of Clintonite, 407.
test for Zirconia, 415.
Buckleya, on the Genus, *A. Gray*, 98.
Burnett, W. I., on Psorospermia, 104.
on the Mermithes, 107.
Life and writings of, 255.
Bushnan's Physiology, noticed, 449.

C.

California, on supposed Corallines of Desert in, 156.
gold and platinum of C. Blanco in, 156, 441.
mammoth trees of, 151, 286.
earthquakes in, 151.
notes on, *W P. Blake*, 441.
Cannons, coupled, 389.
Carbonic oxyd, poisonous effects of, 120.
Carpenter, W. B., Principles of Comparative Anatomy by, noticed, 449.
Carus, Dr. J. V., System der thierischen Morphologie, noticed, 448.
Caricography, *C. Dewey*, 102.
Cassin, J., work on Birds, by, noticed, 157.
Chemical homology, illustrations of, *T. S. Hunt*, 269.
Climate of San Francisco, *H. Gibbons*, 148.
Coan, T., on Kilauea, 96.
Coast Survey, Report for 1852, noticed, 159.
ibid, 1853, reviewed, 200.
Coffin, on winds of North America, 445.
Coloring material of flowers, 434.
Columbium the true name of niobium, 392.
Comets, new, 138, 290, 430.
Cooke, J. P., new filtering apparatus, 127.
on stibiotrizincyle and stibiobizincyle, 229.
Corallines of Colorado desert, on the supposed, 156.

INDEX TO VOLUME XVIII.

A.

Academy Nat. Sci., Philad., Proceedings of, 160. 304, 451.
of Sciences. Paris, elections to, 381.
Air-engine, see *Ericsson*.

Association, list of papers read at Washington meeting, 143.
Amphitrite, a new planet, 137, 290.
Analysis, use of hydrogen and carbonic acid in, *Rogers*, 213.
test for zirconia in, 415.
on *Fuchs's* method for iron, 227.
Anesthesia, local, 122.
Ansted's Scenery, Science, and Art, noticed, 448.
Aquarium, manufactured seawater for, 293.
Arago, works of, announced, 120.
Ararat, height of Mt., 440.
Arseniuretted and antimoniuretted hydrogen, in relation to toxicology. *Napoli*, 190.
Asphyxia, use of oxygen in, 122.
Archives de Physiologie, etc., of Bouchardat, noticed, 157.
Artesian well in Italy, temperature of, 424.
Artificial products of furnaces, *Hausmann*, 421.
Atlas of North America, Lange's, noticed, 449.
Atmosphere, electricity of, *L. Palmieri*, 415
Aurora Borealis, *De la Rive*, 353.

B.

Bache, A. D., Tides of Key West, 305.
Bailey, J. W., on a mode of giving permanent flexibility to specimens, 100.
Baird, S. F., on Serpents of New York, 448.
Barnard, F. A. P., on the comparative expenditure of heat in different forms of Air engine, 161.
Beale, T., on the microscope, noticed, 302.
Becquerel, on electro-chemical action, 382.
Bellona, a new planet, 137, 290.
Benzine, for Greek fire, 388.
Benzoëoxyd and allied compounds, 412.
Bibliographical notices, by *J. Nicklès*, 302.
Birds, work on, by *J. Cassin*, noticed, 157.
Bischof's Lehrbuch, noticed, 426.
Blake, W. P., on gold and platinum of C. Blanco, 156.
on earthquakes in California, 151.
notes on California, 441.
Blood, fountain of, in Honduras, 439.
Blowpipe with india rubber barrel, 121.
Boscovich's theory, *E. B. Hunt* on, 243.
Boston Soc. Nat. Hist., Proceedings of, 159.
Botanical Bibliography, 131, 284, 428.
Botanical specimens, mode of giving flexibility to, *Bailey*, 100.
Brazil, map of, by *Martius*, 156.
Brant, J. R., on Fuchs's method for the determination of Iron, 227.
Brucine, decomposed by nitric acid, 413.
Brush, G. J., chemical composition of Clintonite, 407.
test for Zirconia, 415.
Buckleya, on the Genus, *A. Gray*, 98.
Burnett, W. I., on Psorospermia, 104.
on the Mermithes, 107.
Life and writings of, 255.
Bushnan's Physiology, noticed, 449.

C.

California, on supposed Corallines of Desert in, 156.
gold and platinum of C. Blanco in, 156, 441.
mammoth trees of, 151, 286.
earthquakes in, 151.
notes on, *W P. Blake*, 441.
Cannons, coupled, 389.
Carbonic oxyd, poisonous effects of, 120.
Carpenter, W. B., Principles of Comparative Anatomy by, noticed, 449.
Carus, Dr. J. V., System der thierischen Morphologie, noticed, 448.
Caricography, *C. Dewey*, 102.
Cassin, J., work on Birds, by, noticed, 157.
Chemical homology, illustrations of, *T. S. Hunt*, 269.
Climate of San Francisco, *H. Gibbons*, 148.
Coan, T., on Kilauea, 96.
Coast Survey, Report for 1852, noticed, 159.
ibid, 1853, reviewed, 200.
Coffin, on winds of North America, 445.
Coloring material of flowers, 434.
Columbium the true name of niobium, 392.
Comets, new, 138, 290, 430.
Cooke, J. P., new filtering apparatus, 127.
on stibiotrizincyle and stibiobizincyle, 229.
Corallines of Colorado desert, on the supposed, 156.

Crustacea, geographical distribution of, *J. D. Dana*, 314.
new Cryptopodia, *J. D. Dana*, 430.
Cyanine, 434.

D.

Dana, J. D., on the homœomorphism of minerals of the trimetric system, 35, 131.
ibid., of the dimetric and hexagonal systems, 131.
on the chlorite section of hydrous silicates, 128.
on Wöhlerite and Keilhauite, 130.
on Leadhillite, 249.
on the so-called silico-titanates 253.
on Tourmaline, 254.
Geographical distribution of Crustacea, 314.
on formula of Clintonite, 409.
figures of crystals of some minerals, 417.
notes on some furnace slags, described by Hausmann, 422.
notice of 4th edition of Mineralogy by, 424.
new Cryptopodia, 430.
De la Rive, on the Aurora Borealis, 353.
Deville, H. St. C, on aluminium, 119.
on loss of weight of some minerals by heat, 269.
heating lamp, 391.
Dewey, C. on Caricography, 102.
Dilatation, measure of, *Silbermann*, 388.
Dimorphism, *Pasteur*, 433.
Dyeing wool, new red for, 123.

E.

Earthquake, city of San Salvador destroyed by, 277.
Eclipse, annular solar, of May, 128, 142.
Electric currents, thermic researches on, *Favre*, 124
illumination, 385, 438.
induction, *Faraday* on, 84.
Electricity, contrary currents on same wire at same time, 118.
proportion of gases in decomposition of water by, 118,
origin of copper deposit, 118.
firing mines by, 387.
of atmosphere, *L. Palmieri*, 415.
during evaporation of salt water, 384.
Electro-chemical action, *Becquerel*, 382.
magnetic induction, 385.
Engraving, homœographic, 441.
photographic, 390.
Nature doing her own, 440.
Ericsson's Engine, on heat expended in, *F. A. P. Barnard*, 161.

F.

Falling bodies, resistance of air to, *Loomis*, 67.
Faraday, M, on electric induction, 84.
Filtering apparatus, new, *J. P. Cooke*, 127.
Fischer, of St. Petersburg, death of, 429.
Floræ Danicæ, etc., 284.
Forbes, E., Professor at Edinburg, 156.
Uses of Museums, 340.
Fountain of Blood in Honduras, 439.
Fownes's Chemistry, noticed, 301.
Frankland, E., on gas light illumination, 295.
Furnace slags, *Hausmann*, 421.

G.

Galvanic battery of melted glass, 384.
reduction of metallic chromium, 266.
Galvanism, see further, *Electricity*.
Genera Plantarum Floræ Germaniæ, etc., noticed, 284.
Gas-light illumination, *Frankland*, 295.
Genth, F. A., Contributions to Mineralogy, 410.
Geographical Department in Congress, Memorial on, 151.
Distribution of Crustacea, *J. D. Dana*, 314.
Geology, Hitchcock's, noticed, 157.
crystalline limestones, age of, *T. S. Hunt*, 193.
Silurian System, observations on, *Murchison*, 394.
Gibbes, L. R, effect of solar eclipse on magnetic intensity, 139.
Gibbons, H., on climate of San Francisco, 148.
Gibbs, W., chemical abstracts by, 124, 264, 412.
Glucina, *Weeren* on, 414.
Gosse, P. H., on manufactured seawater for the aquarium, 293.
Gray, A., notices of books, 131, 284, 428.
on Buckleya, 98.
Gray's Botany of U. S. Exp. Expedition, 132.
Greek fire, new, 388.
Griffith and Henfrey, Microscopic Dictionary of, noticed, 131, 285.
Gulf Stream Exploration, 204.

H.

Hail, protection against, 432.
Hausmann, on furnace slags, 421.
Hayes, A. A, on borocalcite, 95.
Heat, mechanical action of, *Rankine*, 64.
note on mechanical action of, *F. A. P. Barnard*, 300.
expenditure of, in air-engine, *F. A. P. Barnard*, 161.
used in taking impressions, 438.
Heating lamp of *Deville*, 391.
Heights of places in the Caspian Basin, and of Mount Ararat, 440.
Henck's Fieldbook for Railroad Engineers, 158.
Hitchcock's Elementary Geology, noticed, 157.
Holland's method of desulphurizing metals, 291.
Homœography, 441.
Homœomorphism of mineral species of the Trimetric System, *J. D. Dana*, 35.
of the dimetric and hexagonal systems, 131, 271.
Honduras, Fountain of Blood, 439.
Hooker's Flora of New Zealand, noticed, 132.
Icones Plantarum, noticed, 284.
Flora of New Zealand, noticed, 284.
Hooker, W., Human Physiology by, noticed, 448.
Hunt, E. B., on the nature of forces, 237.
on map projections, 326.

Hunt, T. S., on the N. A. crystalline limestones, 193.
illustrations of chemical homology, 269.
Hurricane, on the Brandon, *O. N. Stoddard*, 70.
of September, 1853, *W. C. Redfield*, 1, 176.
Hydrargyro-methyl and hydrargyrethyl, 413.
Hydrocyanaldin, 413.

I.

Illumination by electric light, 385, 438.
Infusoria of the Mississippi silt, proportions of, 158.
Iron, on Fuchs's method for determination of, *Brant*, 227.
Isomorphism of minerals of the trimetric system, *J. D. Dana*, 35, 131.
of the dimetric and hexagonal systems, 131, 271.
Isomorphous and homœomorphous species, on series of, *von Kobell*, 271.

J.

Johnston's Chemistry of Common Life, noticed, 448.
Judea, views of monuments in, taken by photography, 437.

K.

Kenngott, G. A., Krystallformenetze, etc., noticed, 159.
Kobell, v., on series of isomorphous and homœomorphous forms, 271.
on chloritoid and clinochlore, 272.
Kilauea, *T. Coan* on, 96.

L.

Lallemand, death of, 431.
Lange's Atlas von Nord America, 449.
Lathrop, S P., Meteorological Journal for 1853, at Beloit, 146.
Laurent's Méthode de Chemie, *Biot's* Preface to, 443.
Leidy on the fossil animals of the Mauvaises Terres, 446.
Level of Sea, on Changes in, *A. Tylor*, 21, 216.
Leverrier, on the small planets, 80.
Light, on certain properties of, *D. Alter*, 55.
Limestones, on the age of the N. A. crystalline, *T. S. Hunt*, 193.
Linnæa, noticed, 285.
Loomis, E., on the resistance experienced by bodies falling through the air, 67.

M.

Macgowan, D. J., on Chinese and Aztec Plumagery, 57, 156.
Magnetism by rotation, 386.
Magneto-electric currents, *Sinsteden*, 264.
Mallet, J. W., on the Norwich phosphate, 33.
Manual of Natural History for Travellers, noticed, 301.
Map Projections, *E. B. Hunt* on, 326.
Mastodon, discovery of, at Poughkeepsie, N. Y., 447.
Maury's Astronomical Observations, 153.
Melloni, death of, 431.
Mermithes, *W. I. Burnett*, 107.
Metals, method of desulphurizing, 291.
Metallic Wealth of the United States, J. D. Whitney on, noticed, 274.
Meteoric iron of Sonora, *C. U. Shepard*, 369.
Meteorology, San Francisco, *H. Gibbons*, 148.
Meteorological Journal, for 1853, kept at Beloit, *S. P. Lathrop*, 146.
Microscope, L. Beale on, noticed, 302.
bi cular, *E. D. North*, 61.
MINERALS, analyses of, *J. L. Smith*, 372.
G. J. Brush, 407.
F. A. Genth, 410.
homœomorphism of trimetric species, *J. D. Dana*, 35, 131.
ibid. of dimetric and hexagonal systems, 131.
Albite from Middletown, form of, 419.
Andalusite, Staurotide and Topaz, relations of, in form, 45.
Anglesite of Phenixville, forms of, 419.
Apophyllite of Lake Superior, 380, 419.
Aphrosiderite, formula of, 129.
Aurotellurite, 51.
Barytes, forms of, 419.
Babingtonite ? crystal of, 417.
Boltonite identical with Chrysolite, *J. L. Smith*, 372.
Borocalcite, *A. A. Hayes*, 95.
Calcite, of Bristol, Ct., form of, 421.
Chlorite section of Silicates, formulas of, *J. D. Dana*, 128.
Chloritoid, formula of, 129.
of Bregratten, *von Kobell*, 272.
Chrysotile, analysis of, *F. A. Genth*, 410.
Clintonite, formula of, 129, 411.
G. J. Brush, 407.
Clinochlore of the Tyrol, *von Kobell*, 272.
Copiapite, analysis of, *J. L. Smith*, 374.
Copper Glance, crystals of, 417.
Cronstedtite, formula of, 129.
Cuban, analysis of, *J. L. Smith*, 381.
Delessite, formula of, 129.
Descloizite, crystallization of, 131.
Dimorphine, forms of, 49.
Dolomite of Hoboken, form of crystal of, 420.
Feldspars, formulas of, *T. S. Hunt*, 270.
Gold of Cape Blanco, 156.
Idocrase, crystals of, from Maine, 419.
Iodid of Silver, analysis, *J. L. Smith*, 374.
Iron, protosulphuret, *J. L. Smith*, 380.
Keilhauite, formula of, 129.
Lanthanite, *J. L. Smith*, 378, 427.
Laumonite, 130.
Leadhillite, relations of, in form, to Anglesite, 249.
Leucopyrite, 49.
Lievrite, 45.
Loxoclase of Hammond, form of, 419.
Mangano-magnesian Alum, *J. L. Smith*, 378.
Margarite, formula of, 129.
Marcasite, relation in form to Sulphur, 51.
Mispickel, crystal of, 417.
Mosandrite, on formula of, 254.
Owenite identical with Thuringite, *J. L. Smith*, 376.
ibid, *F. A. Genth*, 411.
Platinum of Cape Blanco, 156.

Minerals—
Polycrase, form of, 46.
Pyrites, crystals of, 417.
magnetic, 380.
Pyrosclerite, formula of, 129.
Pyrophyllite, analysis of, *F. A. Genth*, 410.
Pyroxene, form of, 417.
Quartz, new forms of, *J. D. Dana*, 417.
Ripidolite, formula of, 129.
Salt and Gypsum of Virginia, 273.
Scapolite, on alteration of, *v. Rath*, 272.
Schorlomite, on formula of, 253.
Schreibersite, analysis, *J. L. Smith*, 380.
Scolecite, analysis of, *F. A. Genth*, 410.
Spodumene, form of, 417.
Struvite, crystallization of, 131.
Thuringite, 376, 411.
formula of, 129.
Topaz, 45, 269.
of Trumbull, Ct., form of, 419.
Tourmaline, forms of, 419.
on formula of, 254.
Triphyline of Norwich, *Mallet*, 33.
Tscheffkinite, on formula of, 253.
Wöhlerite, crystallization of, 46.
formula of, 129.
Xenotime of Georgia, form of, 421.
J. L. Smith, 377.
Zircon, crystal of from N. Carolina, 417.
Mineralogy, 4th edition of System of, by J. D. Dana, noticed, 424.
works on, published during the years 1852 and 1853 to middle of 1854, 425.
Mississippi River, *R. A. Marr* on, 158.
Moricand, death of, 429.
Murchison's Siluria noticed, 301, 394.
Murexid, 123.
Museums, uses of, *E. Forbes* on, 340.

N.

Napoli, R., on arseniuretted and antimoniuretted hydrogen, and their relations to Toxicology, 190.
Natural History review, Dublin, noticed, 302.
Nicklès, J., correspondence of, 114, 381, 431.
Niobium is Columbium, 392.
North, E. D., on the binocular microscope, 61.

O.

Obituary, Beautems Beaupré, 115.
Fischer, of St. Petersburgh, 429.
Jameson, R., 156.
Lallemand, Melloni, 431.
Roux, 114.
Roussin, 115.
Victor Mauvais, 116.
Wallich, 133.
Webb, P. Barker, 429.
Oil of cinnamon, artificial production of, 414.
Olmsted, D., eclipse of 1854, 142.
Owen, on the principal forms of the Skeleton and the Teeth, noticed, 448.
Oxygen, use of, in asphyxia, 122.

P.

Paris Observatory, 117, 293.
Pasteur on a case of dimorphism, 433,
Photographs, on painting, 437.
Photography, 122, 390.
collodion for, 390.
new kind of collodion, 437.
engraving from, 390.
Planets, new, (Bellona, Amphitrite,) 137, 290.
on the small, *Leverrier*, 80.
new, 430.
Plants, diseases of, 433.
coloring material of flowers of, 434
fossil, in amber, 287,
Plantæ Junghuhnianæ, noticed, 428.
Platinum, note on discovery of, 447.
Plumagery, on Chinese and Aztec, *D. J. Macgowan*, 57, 156.
Powder, manufacture of, 436.
Propionic acid, in fermentation, 413.
Psorospermia, *W. I. Burnett*, 104.
Pyro-electric currents, *Becquerel*, 384.

Q.

Quatrefages's Souvenirs d'un Naturaliste, noticed, 448.
Quekett, *J.*, Lectures on Histology by, noticed, 157.
Quinine, composition of, 413.

R.

Rainbow by light reflected from water, *E. S. Snell*, 18.
Rankine, W. J. M., mechanical action of heat, 64.
Rath, v., on alteration of scapolite 372,
Redfield, W. C. Hurricane of Sept., 1853, and notices of other storms, 1, 176.
Refraction, double, temporarily produced, *Wertheim*. 124.
Report of Regents of University of New-York, noticed, 449.
on State Collection, noticed, 449.
Rive, A. de la, on the aurora borealis, 353.
River, on Mississippi, 158.
Rogers. H. D., Report on the salt and gypsum of Virginia, noticed, 273.
Rogers, W. B., and *R. E.*, use of hydrogen and carbonic acid in analysis, 213.

S.

San Salvador destroyed by an Earthquake, 277.
Seawater manufactured for the aquarium, 293.
on preserving balance of animals and plants in, *Warrington*, 133.
Sea-level, changes in, A. Tylor, 21, 216.
Seeman's Botany of the Herald, noticed, 132, 429.
Serpents of New York, *S. F. Baird* on, referred to, 449.
Shepard, C. U., on meteoric iron of Sonora, 369.
Silbermann, measure of dilatation and contraction, 388.
Siluria, introductory chapter of Murchison's, 394.
Sinsteden, on magneto-electric currents, 264.
Smith, J. L., Reëxamination of American minerals, 372.
Smithsonian Contributions to Knowledge, vol. vi. of, noticed, 445.

Snell, E. S., on a rainbow by light reflected from water, 18.
Spirit-rappings, 382.
Stereoscopy, 122, 437.
Steudel's Synopsis Plant. Glum., noticed, 428.
Stoddard, O. N., on the Brandon Tornado, 70.
Storm of Sept., 1853 and others, *W. C. Redfield*, 1, 176.

T.

Table Turnings, 119.
Tannic acid composition of, 412.
Taurine, artificial production of, 414.
Telegraph, on electric induction of wires of, *Faraday*, 84.
Temperature from an artesian well in Italy, 424.
Thermotypy, 438.
Thomson, Dr. Thos., Life and labors of, 441.
Tides and tide gauges, Coast Survey, 206.
Tides of Key West, *A. D. Bache*, 305.
Tides of the White sea, *Tulyzine*, 292.
Tornado, see Hurricane.
Toxicology, arseniuretted hydrogen in relation to, *R. Napoli*, 190.
Trask's Report on Geology of California, 302.
Trees, mammoth, of California, 150, 286.
